Audio CD/MP3 Player
The enhanced CD player is compatible with regular-shaped 12cm discs containing CD audio and MP3 music files stored on CD-R, CD-RW discs. Copy-protected CDs which do not comply with international audio CD standards (Red Book) may not be supported.

Electronic Shock Protection (ESP)
Electronic Shock Protection allows a 10-second (CD-DA) buffer memory to ensure continuous music playback regardless of excessive vibrations.

Speed Dependent Volume Control
Intelligent volume control which automatically adjusts the volume level to the speed of your car (SDVC=SMART Volume).

2-Channel Preamp Out (2V)
Ensures that the music arriving at the external power amplifier is clear and sharp with less background noise.

Programmable Steering Wheel Remote Control Interface
This programmable interface allows for the operation of the head unit via the OEM steering wheel remote control.

Full Detachable Flipdown Front
Deter theft by removing the detachable front of the radio head unit whenever you leave the car and simply slide the front back into position upon your return.

RDS Clock
Automatic adjustment (station dependent) of the clock display as you move through time zones, incl. leap years, and summer/wintertime changes.

Auxiliary Input (Front 3.5mm Jack)
Project music from an externally-connected music player onto the vivid car speakers.

Switchable Illumination
A cool feature that lets you customize the color of the display to the color of your dashboard illumination.
